## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure is objected to because it is a run-on type sentence. Correction is required. See MPEP § 608.01(b).

### ***Claim Objections***

Claim 3 is objected to because the phrase "without possibility of rotation" is inappropriate since the connection could be rotated by some force, even if not intended in the design. Note that the change was made to claim 2, but not to claim 3. Appropriate correction is required.

Claim 9 is objected to because it does not further limit claim 8.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Stover (U.S. Patent 4,666,355).

Stover discloses an attachment system to be introduced into a mounting opening of a hollow body (10) having holding projections (19). The system includes a rear engagement member (18) insertable through the mounting opening, for engaging the holding projections from

behind, and displaceable between first and second positions (Figures 3 and 4). There is a stop (30), fastening means (12) and a device (40) for providing relative rotational movement between the stop and the rear engagement member (18). This configuration meets the recitation of a transformation device.

Regarding claim 3, the locking means (44) is at a free end of the actuator.

Regarding claim 4, this locking means (44) combined with slot (38) prevents rotation in the opposite direction.

The fastening means is a screw.

#### ***Allowable Subject Matter***

Claims 2 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments filed August 26, 2005 have been considered but are moot in view of the new grounds of rejection.

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3671

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
